Subject: Microsoft Settlement

I believe that the proposed Microsoft - DOJ settlement is a sell-out to Microsoft (hereafter called MS). The proposed settlement doesn't achieve much at all. It doesn't punish MS sufficiently for its proven monopolistic, illegal behavior. It doesn't call for any serious remedies that would preclude MS from doing all sorts of monopolistic behaviors. It allows them to do whatever they want, however they want, whenever they want.

The only good result is that now MS is know as an illegal monopoly.

Please rethink the proposed settlement to put some real teeth in it.

Dan Girton
